

FRIENDS FOREVER

2025 REPORT

 *#give hope*

JANUARY

This month, ROLDA responded to several cases where rescued animals needed urgent veterinary care and ongoing treatment that their caregivers could not afford on their own.

Sabina found a cat that had been seriously injured after being attacked by dogs. The cat was in a critical condition and needed to be taken to a veterinary clinic immediately. After being examined, the veterinarian determined that emergency surgery was necessary to treat her injuries. Sabina did everything she could to help the cat, but the unexpected veterinary expenses were beyond what she could afford. ROLDA stepped in to cover the cost of the surgery and the necessary medical care, giving the injured cat a chance to recover in safety.

We also supported Getuta, who cares for several cats with congenital health conditions that require ongoing treatment and regular monitoring. Because these conditions are present from birth, the cats need continuous medical support, making their care a significant financial burden.

Getuta does everything she can to provide for them, but her limited income makes it difficult to cover their medication and veterinary expenses on her own. ROLDA helped with the necessary treatments, ensuring that the cats could continue receiving the care they need.

**Total amount spent:
3650 lei (aprox. 700 euro)**

FEBRUARY

During the month, ROLDA continued to support animals in need and the people caring for them. Mrs. Anisoara reached out for help with her little dog, Lolica, who had developed a large lump. As she could not afford the veterinary costs, ROLDA covered her consultation, X-ray, and treatment. Unfortunately, two liver tumors were discovered, and Lolica is now receiving appropriate treatment. ROLDA also supported Ovidiu, a dedicated veterinarian who visits underprivileged villages to provide veterinary care to elderly people who cannot travel to a clinic. With our support, six cats and dogs were sterilized and received their necessary vaccinations.

Mrs. Doina also contacted us about her tomcat, Misu, who was found in very poor condition with three pelvic fractures, a jaw injury, and liver problems. ROLDA helped cover his treatment, and he has started to feel better and is now able to eat on his own.

We also assisted Mrs. Violeta, who cares for numerous dogs rescued from the streets and is now managing everything on her own following the passing of her mother. After taking in two paralyzed dogs, she reached out to ROLDA for help with food for the animals in her care.

Another case was Pusy, Mrs. Geta's tomcat, who has serious heart problems and cannot undergo traditional castration. He therefore needed an implant as an alternative. As Mrs. Geta could not afford the procedure, ROLDA helped cover the costs.

**Total amount spent:
1.718 lei (aprox. 344 euro)**

MARCH

Throughout the month, ROLDA responded to several urgent requests for assistance, helping vulnerable animals and the people who continue to care for them despite difficult circumstances.

Mrs. Gabriela reached out to us for help with food for the animals in her care. As a pensioner, she is struggling to cover the ongoing costs of caring for the many animals she has rescued, and ROLDA provided support with food to help ease the financial burden.

Mrs. Stefania also received support from ROLDA. She had previously contacted us for help building a small shelter for her cats, as she was at risk of having nowhere to house them during the winter. As she was unable to manage all the maintenance costs, eight of her cats also needed to be sterilized. ROLDA helped cover the sterilization expenses, ensuring they received the necessary veterinary care.

We also assisted Mrs. Gabi, a devoted animal lover who found a cat with an injured leg on her street. Unfortunately, some of her neighbors had locked the cat inside a shed because they did not want her around. Mrs. Gabi managed to free the cat and, with the help of a young man, was able to catch her and take her to a veterinary clinic for evaluation. ROLDA covered the costs of the necessary tests, and we are now waiting for the results to determine the appropriate treatment.

**Total amount spent:
3031 lei (aprox. 600 euro)**

APRIL

Mrs. Luci from Constanta, whom ROLDA has supported in the past, reached out for help with an elderly street dog she had been feeding for many years. The dog, who is over 10 years old, became seriously ill and developed severe swelling. He was taken to a veterinary clinic, where he was examined and treated, and the accumulated fluid was removed. After receiving care, he returned to the field where he had been living, as unfortunately, Mrs. Luci was unable to find him a foster home or permanent home.

We also assisted Mrs. Gaby, who found a cat on the street bleeding from the mouth and in very poor condition. She immediately took him to a veterinary clinic and contacted ROLDA for help. The cat was diagnosed with feline stomatitis, a painful condition affecting the mouth that is often seen in stray cats with weakened immune systems. Viral diseases with similar symptoms, including feline leukemia, feline immunodeficiency, and calicivirus, were ruled out. As he was unable to eat or drink on his own, he received fluids, electrolyte support, antibiotics, pain relief, and anti-inflammatory medication. He also underwent a full dental cleaning and scaling, had two teeth extracted, and was neutered.

Mrs. Geta contacted us again regarding her 15-year-old cat, Misy, who had lost a significant amount of weight, was not eating properly, and had started vomiting frequently. Following a veterinary consultation, she was advised to bring Misy in for further tests, treatment, and special food. ROLDA helped cover the costs of her tests, ultrasound, and treatment. We also supported Mrs. Geta with the treatment needed for Pusy, her cat who suffers from heart problems.

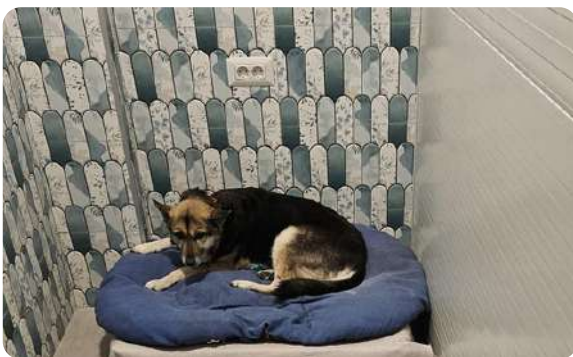

APRIL

Mrs. Ilinca, who cares for several animals, also reached out for assistance. The costs of treating Tigruta after she became ill were higher than expected, leaving Mrs. Ilinca without enough funds to provide the special food needed by her other cats. As caring for the animals often comes before her own needs, ROLDA stepped in and sponsored the food they required.

We also supported Mrs. Dana, who has a very low income and is caring for her father while also looking after several dogs she rescued from the streets. She had made sure that all the dogs were dewormed and neutered, but was unable to afford enough food to provide for them throughout the month. ROLDA helped cover the cost of food for the animals in her care.

Sadly, one of the cases we supported this month had a heartbreaking outcome. Mrs. Tanta reached out for help with her dog, Blacky, who was suffering from kidney failure and required urgent veterinary care. Blacky was admitted to the clinic on March 15, 2025, where she underwent extensive investigations and began intensive treatment with intravenous fluids and injectable medication. She initially had a creatinine level of 7.7, which was reduced to 2.6 with treatment, while her white blood cell count decreased from 51 to 22.3. Despite the efforts of the veterinary team and the treatment provided, Blacky's condition was too severe, and sadly, she passed away.

**Total amount spent:
9588 lei (aprox. 1850 euro)**

MAY

Mrs. Gabi reached out to us again regarding a tomcat she had previously rescued from the street in a very advanced stage of illness. ROLDA had previously helped cover the costs of his medical investigations. After being neutered, the cat developed an ulcer on his tongue, and further investigations revealed severe feline stomatitis, a painful condition commonly seen in stray cats with weakened immune systems. Viral diseases with similar symptoms, including feline leukemia, immunodeficiency, and calicivirus, were ruled out. As he was unable to eat or drink on his own, he required fluids, electrolyte support, antibiotics, pain relief, and anti-inflammatory medication. He also underwent dental cleaning, full oral sanitation, and two tooth extractions. ROLDA helped cover the costs of his treatment and veterinary care.

Mrs. Geta also reached out for help with her two cats, Misy and Mica, both facing serious health problems. Misy, 15, had lost significant weight, was vomiting frequently, and was diagnosed with pancreatitis and a small nodule. Mica continued to suffer from fluid accumulation in her chest and required repeated drainage and treatment. ROLDA covered the veterinary costs for both cats.

We also assisted Mrs. Lidia, who is dealing with several health problems and is no longer able to walk following surgery. As she could not manage the care of her animals alone, ROLDA covered the costs of deworming her dogs and cats.

**Total amount spent:
3566 lei (aprox. 680 euro)**

JUNE

This month, ROLDA continued to provide support for animals in need and the people caring for them.

Mrs. Gaby contacted us again regarding the tomcat she rescued from the street last month. Although his mouth wounds are healing after treatment, dental cleaning, and two extractions, he still requires medical care and monitoring. This month, she also rescued his sister, who was taken to the same clinic for investigations. She is still shy and wary of human contact, but with time and patience, we hope she will learn to trust people again. ROLDA covered the veterinary costs for both cats.

Mrs. Geta also reached out for help with Pusy, whom she has cared for over many years. He suffers from a heart malformation, and due to her limited income, she cannot afford his ongoing treatment. ROLDA helped cover the necessary costs so Pusy can continue to receive the care he needs.

We also supported Mrs. Corina, who lives on a very modest income and struggles to provide proper food for her dog, Bobiță. As he suffers from digestive problems and requires a special diet, ROLDA stepped in to provide the food he needs.

**Total amount spent:
2213 lei (aprox. 420 euro)**

JULY

Mrs. Mery contacted us for help with the sterilization of a cat she had rescued from the street. As she has a limited income and could not afford the procedure, ROLDA covered the sterilization costs. The cat is now safely under Mrs. Mery's care.

Mrs. Gustea, who has a very low income, cares for many animals rescued from the streets. After moving to a village on the outskirts due to difficulties with her neighbors, she faced additional expenses and struggled to provide enough food for all the animals. ROLDA stepped in and provided the necessary food.

Mrs. Luci also reached out after finding three puppies in a field. One was healthy, another was slightly unwell and required treatment, while the third was diagnosed with parvovirus and needed hospitalization. ROLDA covered the veterinary costs, including tests, treatment, vaccination, and the hospitalization of the most seriously ill puppy.

Mrs. Geta contacted us regarding Tony, her cat, who developed vomiting and digestive problems. Due to her limited income, she could not afford the necessary investigations. ROLDA helped cover the costs, and the results revealed changes in his liver values, possibly related to the long-term use of Methylprednisolone for his allergies. Tony is now receiving treatment, and we hope he will recover soon.

**Total amount spent:
3735 lei (aprox. 750 euro)**

AUGUST

This month, ROLDA continued to support animals in need and the people who dedicate their time and limited resources to caring for them.

We also supported Mrs. Flori, a kind-hearted animal lover who never hesitates to stop and help an animal she finds on the street, whether by providing food, water, or other essential care. She currently looks after several dogs she has rescued, but with a very limited income, covering their monthly needs can sometimes become overwhelming. ROLDA helped provide food for the animals in her care, ensuring they had what they needed despite the financial difficulties she was facing.

Mary also reached out to us for help with two cats she had rescued from the street and was doing her best to care for. One of the cats became seriously ill and was diagnosed with kidney failure, requiring immediate veterinary attention. He underwent blood tests and needed intravenous fluids to help stabilize his condition and support his kidney function. As Mary could not afford the necessary medical expenses, ROLDA stepped in to cover the costs of the investigations and treatment. With this support, the cat was able to receive the care he needed, while Mary could continue looking after both rescued cats without the additional financial burden.

**Total amount spent:
1000 lei (aprox. 200 euro)**

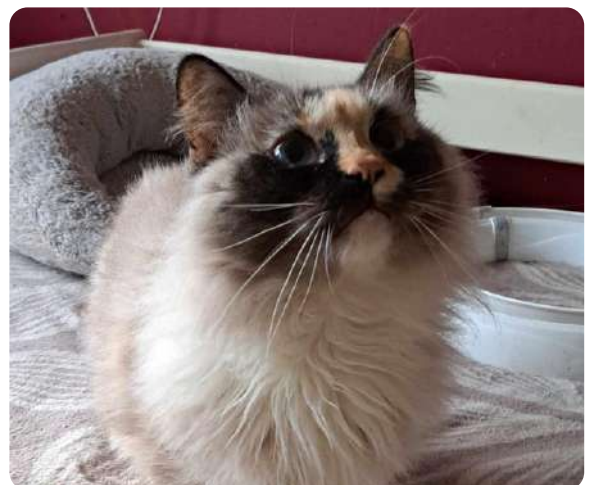

SEPTEMBER

Mrs. Dana reached out to us regarding a very special case, a 20-year-old tomcat who had recently been taken into her care after his previous caregiver could no longer look after him. When he arrived, he was in poor condition, with very little appetite, balance problems, and a severe cold. He was taken to the veterinarian, where he underwent blood tests and an ultrasound.

The investigations revealed an abnormal albumin-to-globulin ratio, urinary sediment and a bladder stone, as well as a lymph node enlargement behind one of his kidneys and a respiratory infection. Given his advanced age and fragile condition, he required careful monitoring and appropriate treatment. ROLDA helped cover the costs of his investigations and medical care.

Gabriela also contacted us after rescuing a tomcat from the street and taking responsibility for his care. The cat needed deworming treatment after being rescued, but Gabriela was unable to afford the veterinary expenses on her own. ROLDA stepped in to cover the necessary treatment, helping the cat start his recovery in a safer and healthier environment. Thanks to Gabriela's intervention and the support provided by ROLDA, he is now receiving the care he needs after being given a second chance off the streets.

**Total amount spent:
1713 lei (aprox. 350 euro)**

OCTOBER

This month, ROLDA continued to support animals with serious medical conditions, helping their caregivers provide the treatment they could not afford on their own.

Mrs. Geta reached out again for help with Pusy and Mica, two cats facing serious health problems. Pusy was born with a severe condition and requires ongoing care and treatment to give him the best possible quality of life. Mica also has a serious condition that causes fluid to build up in her chest and requires regular drainage by the veterinarian. Although she has undergone blood tests and other investigations, a CT scan is still needed to establish an accurate diagnosis. With the ongoing costs of medication, blood tests, and ultrasounds becoming difficult for Mrs. Geta to manage, ROLDA helped cover the veterinary expenses for both cats.

We also supported Mrs. Luci with a dog she had rescued from the street who suffers from epilepsy. The puppy required ongoing treatment to keep his condition under control. Thanks to Mrs. Luci's care and ROLDA's support with his medical expenses, he is now safe and receiving the treatment he needs.

**Total amount spent:
2747 lei (aprox. 550 euro)**

NOVEMBER

Over the course of the month, ROLDA responded to several requests for assistance, helping provide essential medical care and food for rescued animals in need.

Mrs. Geta reached out for help with Pusy and Mica, who both require regular veterinary care to manage their serious conditions. The fluid in their chests needs to be regularly drained, and both cats also require ongoing medication. We also helped with the treatment of Berta, a 15-and-a-half-year-old dog who has suffered a stroke and also has arthritis. With several rescued animals in her care, many of them dealing with health problems, the ongoing costs of medication, veterinary visits, and daily necessities have become increasingly difficult for Mrs. Geta to manage. ROLDA helped cover the necessary medical care and treatment for all three animals.

We also supported Mrs. Gabriela with food for the many animals in her care. Having rescued and taken responsibility for these animals, she continues to provide them with food and daily care despite the financial difficulties involved. ROLDA's support helped ensure that the animals had the food they needed.

**Total amount spent:
1406 lei (aprox. 280 euro)**

DECEMBER

Throughout the month, ROLDA provided support to several caregivers who were struggling to cover the food and medical needs of the animals they had rescued.

Mrs. Ilinca reached out for help with food for her animals, several of whom suffer from liver problems and require a special diet. As she could not afford the additional costs of their dietary needs, ROLDA helped provide the food they require.

We also supported Oana, who rescued several cats from a cemetery on the outskirts of the village. The cats required various treatments after being rescued, and ROLDA helped cover the necessary veterinary care, giving them a better chance to recover and remain safe.

Mrs. Geta also received support with taking her cats to their necessary medical treatments. As she cares for several animals with ongoing health problems, the veterinary visits and treatments have become difficult to manage financially. ROLDA helped cover the costs of their necessary care.

**Total amount spent:
3353 lei (aprox. 650 euro)**
