

To whom it may concern

28000 hectares of forests gone in Romania in the past 10 years and according to media, your company is part of this. When forests disappear, plants, animals and people are affected. There are: climate, hydrologic and geomorphic irreversible consequences. But you already know this. That's why you protect your own country's forests.

You have a moral duty in front of your clients from around the World to give straight answers about these allegations: Is your company involved in illegal logging and is your company a direct beneficiary of the timber illegally produced in Romania?

If you want to make a minimal effort to keep your clients (who care about the nature and about the next generation' future) satisfied and correctly informed, now it's a good time to make a press release with official documents testifying that your company uses only timber produced legally in Romania.

Money is power and in a country like Romania, maybe money can buy silence. But your company clients will be severely disturbed to be, against their wishes, part of an illegal scheme or to hear that your company is managed with no ethics and no moral values.

Romania is the country where these illegal attacks happen only because we allow them to happen! Until we will not!

Stop deforestation!

Stop export of unprocessed wood!

Stop ruin our kids' future! NOW!
